We appex a statement of the commerce of this port fer November. The noticeable points in it are the

large decrease of dutable goods imported and thrown

on the market, the large increase of specie imported and of goods warehoused, and on the other band the decrease of produce exported, while the exports of

fereign goods returned to Europe for a market show

a large increase. Of foreign merchandise the market has taken nearly six and a balf millions less than duriog the same month last year, while our exports of produce and merchandise have been but about a million less. Notwithstanding the cessation of specie

shipments for the greater part of the month, the aggregate still exceeds that of last November.

The business at the Clearing-House to-day was

\$14,317,500. Of the balances, about \$600,000 was

paid in gold, the banks preferring to hold on to their Metropolitan certificates. These institutions, it is

thought, will show about \$25,000,000 of gold in the

average on Monday, beside holding about \$6,000,000

of State money. The heavy shipment of specie at

present going forward has rather checked the disposi-

tion to resume specie payments. Some of the banks

still find it difficult to expand their loans or discounts, from their inability to find unexceptionable paper, and

we should not be surprised if the statement of

Morday shows a further decrease in the line o' loans.

The deposits also will probably show some depletion

from the operations of the State banks, who are draw-

ing on their balances, for the purpose of redeeming their notes from the Metropolitan Bank. This bank

receives sgain to-day on deposit the notes of the Mer-cantile and Exchange Banks of Hartford. The money

market is without important change. Strictly first

class paper goes in the discount houses freely at 7 212

P cent, but the supply of this description, in consequence of the un willingness of leading houses to make

new engagements, is very small. On call, money on

favorite securities is obtained without difficulty at 7 P

cent, and in exceptional cases loans are made as low as

Messrs. Carpenter & Vermilye redeem the notes of

5 2 6 W cent.

A SECCEING AFFAIR.—A man of intemperate habits by the name of Manzy, living near Oweneboto, Ky., is a dynaken franzy on the 19th ultime, struck his wife—a sick and feeble woman—with a piece of fence rail, which fractured her skull, and caused her death in an hour afterward. On his examination, a son and daughter, 14 and 16 years old, testified to the facts, and the father finally pleaded guilty, acknowledging he daughter, 14 and 16 years old, testified to the facts, and the father finally pleaded guilty, acknowledging he had coused his wife's death. He was committed to jail and chained in a cell without windows or fire, and, from what we can learn, without clothing to protect him from the severity of the weather of last weak. On the night of the 24th, an Irishman called Mike Malighan, who was drank, was taken from the streets without any legal authority or commitment, and placed in the cell with Mauzy. After mideight, persons living in the vicinity of the jai heard groams and cries of marder and for help. But it appears that no one heeded them or went near the prison. At 3 o'clock in the morning, by the Jailor's confession, the Irishman was released from custody by the same mysteriou power that had committed him. And at the same time the Irishman was let out. Many's fotters were taken off. At daylight, Mauzy was found speechless and dying, and expired so in after a physician was called. On his body were found a number of severe bruises and marks on his neck, that showed he had been choked. At first, resatisfactory evidence could be obtained as to the cause of his death and the first Coroner's Jury rendered a verdict that the prisoner's death had been caused by intemperate habits and exposure in an unprotected cell. But subsequently, on hearing of the singular imprisonment and release of the Irishman in the cell with the deceased, the Coroner called a second Jury, who, on hearing the testimony stated above returned a verdict of death by violence from the hands of some person unknown and from subsequent exposure. olesce from the banks of some person unknown ad from subsequent exposure. The occurrence has caused a deep feeling in Daviess

County; that a man in the custody of the law, man-acied and powerless, should be prive ely assassinated, is so revolting that the whole matter will be thoroughly sifted, and if the dark suspicious that hang over the affair are verified, the active agent in the crime and his accessories, will be brought to punishment. Whispers had been heard among certain parties of a design to lynch Mauzy for the brutal murder of his wife, which gave confirmation to the idea that the poer, helpless culprit was foully dealt with.

RAILROAD CAR OS FIRE ON THE PRAIRIES.—A CAR
en the Chicago, Burlington and Quincy train took fire
en Monday night last, shortly after leaving Chicago.
The alarm was given, the train stopped, and the fire
put out. There were no passengers in the cars. Oa
leaving Mendota a number of passengers came on
board and took seats in the cars, and after going about
thirty miles the car again caught fire around the stovepipe, the same place as before. Before the train could
be stopped, great confusion took place, and several
ladies attempted to Isap from the windows—the door
of the car having been locked to prevent accidents by
a rush to the door. The train was finally stopped,
and the passengers escaped without any serious injury. The car was so damaged that they were obliged
to leave it.

The Stock market to-day was generally heavy and

not active. The changes, however, were not very important, excepting in Central and Southern. The unexpectedly large shipment of gold by the Atlantic, and the fact that at least an equal amount will probably go by the next steamer, had a depressing effect upon the street. The market appears to be just now in a condition to be easily influenced by unfavorable news from any quarter, while it has already improved so much and so rapidly, that favorable advices can have but slight effect. The party which have been operating for a rise are understood to be carrying large amounts of stocks which they are adding to daily in their movements to sustain the market, while the public do not come in to relieve them. The party are very powerful, and in the present easy state of the money market are enabled to carry the load without difficulty. In the mean time the movement keeps cash stock quite spaces, especially Erie, of which only some 7,000 shares are affost in the street, and the deliveries of the shorts are made with difficulty. There is no reason that this state of things should not continue for some time to come, unless the bulls attempt to realize, when the deficiency of outside descriptions would be manifest and prices break down. Central was irregular to-day, opening at 72 against 73, selling at 73 at the Second Board and closing after the Board at 73]. The October receipte have at last been published by the Company, and show, as we stated some time ago, nearly \$300,000 deficiency as compared with October 1856. The October earnings in 1856 were largely increased by the strike upon the Eric Road, which threw nearly all the traffic between this city and the West upon the Central Road. Southern Michigan fell off from 194 to 175; closing at about 18. Erie closed at 171, which is 1 to cent better than on Friday. The private advices from London by the America in relation to the new loan are highly favorable, the parties interested there expressing the intention to render their full share of aid in extricating the Company from its embarrassments. In the mean time these embarrassments here are increasing, the traffic of the road is still falling off, the most pressing wants of the Company for the payment of working ex-

were \$187,250. The land sales were about \$110,000. It will be noticed by our Washington dispatch that Mr. Cobb has decided to ask of Congress power to make an issue of Treasury Notes. The reduced amount in the National Treasury, about \$7,000,000, makes this or some other step necessary to enable the Secretary to carry on the war. Treasury Notes will probably be the cheapest and most convenient method of bridging over the deficiency in the Treasury until the revival of business increases the receipts from the Customs. They will probably bear a nominal interest, be receivable for all dues to the Government, and

will furnish merchants and others with a convenient facility for Exchange. The rumer in regard to the removal of the city depreits from the Shoe and Leather Bank, although sired in the columns of a cotemporary, have no foun dation. One of the rumors is that the bank objects to the remeval because it would be found embarassing to pay over the balance to the new depository. In regard to this we are authorized to say the bank holds wo and a half millions of Metropolitan certificates, which are guaranteed by all the city banks, and nearly balf a million of specie, which is considerably more than suffcient to pay off the entire amount of city

deposits. A letter from Mesers, Berenberg, Goseler & Co., of

A letter from Messrs. Berenberg, Gossler & Co., of Hamburg, remarks:

"We are not enabled yet to render better accounts of the state of our market; although money is apparently less sought after and discounts declined to 9; we cent, the colonial produce business is in a much depressed state, and transactions of the most limited character and at daily declining rates. With the exception of a few small suspensions we are still without important failures; but we scarcely see that we shall be without them if this state of things is of long duration, and indeed it does not look like an early improvement."

provement. Mesers. Stolterfoht, Frost & Co., in their circular

tay:
"The temporary suspension of the Bank Act, which we reported in our last, averted a catastrophe, the corsequence of which would have been difficult to the mind; it gave an immediate sense of corresponde of which would have been difficult to realize to the mind; it gave an immediate sense of relief, which however has been but momentary, for it did not prevent the occurrence of many further failures of banks and of commercial firms in almost all branches; indeed the gloom has intreased again considerably during the last few days from the fear of an impending misfortune of a very comprehensive nature and the demard for mency in London has become almost as extensive as it was before the suspension,

been supplied in the suspected quarter. The export of specie appears however to have been checked effectually, and it is therefore to be hoped that the rate of discount will not be raised any further. Business which appeared to revive has again come to a stand a d prices are once more little better than comical. We cannot expect any solid improvement in commer-cial affairs, and with it a revival of demand, until a confidence is felt that we are nearly at the end of mer-

cantile disasters." The circular of Messrs, Robt, Benson & Co. thus speaks of the Lordon money market:

The circular of Mesers. Robt. Benson & Co. thus speaks of the London money market:

In our last Circular we mentioned that on the afternoon of the 12th inst, the Government had authorized the dack of England to exceed, if found needful the fixed issue of its notes. This act of the Government gave rise to a more cheerful tone of feeling, which has not been fully minimized, owing to the numerous failures which have occurred among houses connected with the American, Swedish and other branches of trade, using obteing from the non-receipt of remittances from America, and the great fall which has taken place in the prices of produce repersity. The weak has consequently bene one during which great anxiety has been felt among the mercantile community here and in the provinces.

The den and for discount see amoustion at the Bank of England has been very active—increased, no doubt, by many of the ordinary channels of accommoda ion being closed. At one time apprehensions were entertained that the Sank of England might have for her to raise the minimum rate of discount. But it is hepped that the step may not be needful, inamunch as the foreign demand for specie has almost ceased, the arrivals from Australia are considerable, and the withdrawals from the Bank, in order to strengthen the patient of Scotch and Irish banks, have stopped the run upon them having now nearly subsided. Very extensive transactions have taken place in the public founds. Large amounts have been thrown upon the market by our banking institutions. The public have, however, on the other hand, continued to be large purchasers. M nery formerly lodge do in deposit have apparently been withdrawn, and so tavested. The price of Consols have taken place in the minimum has been trained. We quoted them has week at \$69,479 for money, and \$99,479 for the secont.

A last amount of business has been transacted in American Secontits. The better accounts brought by the last steamer have imparted some life to the market, but the position of monetary affairs checks much

prices.

Burlows in Manchester remains almost suspended, owing to wast of confidence smong all classes of buyers, and where transactions take place they are generally at the lowest rates of last week. The working of the mills on short time is very prevalent. The Liverpool Cetton market has been very quiet. The sales for the week amount to about 20,500 bales with great irregularity in prices.

An adjourned meeting of the stockholders of the New-York Central Railroad was held at the office of he Continental Insurance Company, No. 18 Wall street, an Saturday last George R. Trimble presided, and James Gallatin, eeq. officiated as Secretary. The Special Committee of Five, appointed at a previous meeting, to take into consideration the election of a new Board of Directors on the 9th inst., through Theodore Dehon, esq., reported at a meeting beld on the 2d inst., that on the 28th ult. they addressed a communication to the Hon. Erastus Corning, President of the Road, ir quiring of him whether a list had been made out of the proposed new Directors to be voted for at the ensuing election on the 9th inst., and if so, requested to be furnished with a list of the same, with a view of submitting them to the adjourced meeting of the stockholders; that to this communication Mr. Coming replied that he was not aware of any such list having been prepared, nor that any such course had been heretofore adopted; and that he should not feel willing to assume the responsibility of preparing such a list; that on the con'rary, as the representative of such stockholders as had thought proper to send their proxies to him, he had considered it desirable to keep the matter under advisement until the annual meeting, when, with the knowledge he might then have and the opportunity then offered of consultation with stockholders present, to vote such ticket for Directors as he believed would best promote the interests of the Company; that the elections had gen erally been attended by others beside himself holding large proxies, and that with unimportant exceptions, the elections had been conducted with almost entire

upanimity.

New York Central R. R. Go.

Dear Sir: Your letter of the latinst, in answer to our communication of Nov. 28, we have the pleasure to acknowledge, and at the same time respond to. We were aware that in past years the stockholders of the New York Central Railroad Company here have been ignorant of the name of the Directors proposed to be veted for until the eve of election. Indeed we telleve the ticket has not been made generally public until the morraing upon which the vote was taken. We are quite aware that on the composition of such a ticket consideration is necessary and useful, but looking at the number and variety of the steeksholders, their residences separated from each other, the remerally-prese attendance in person at the election, and the magnitude of the property with which the Directors are intensted, in our judgment at least twenty days public notices should be given in advance of the ticket proposed to be votal for. It gives time for examination by stockholders of the names presented will best promote the interest of each holders, in the care of their property.

Under the present system of concentrating proxies in the hands of some few, toecholders bindly your. Indeed, the judgment of others is substituted for their own in a matter of much importance to the interest of each. We submit these views to your candid consideration in these sentiments and shall be glad if they lead you to reconsider the promiter of exchanging views with un upon the names suitable as Directors of the New-York central Railroad Company the ensuing year, so that they may be laid before the adjourned meeting of the New-York stockholders, on Thurdey next.

Very respectfully, your obdt, servants, Minrheis......Reported by Telegraph.

be laid before the adjourned meeting of the New York stock-holders, on Thursday next.

Yery respectfully, your obdt. servants,

THEODORE DEBON, James Gallatin, John P. Moore, Morian
Delano and Schuyler Livingston, Committee.

The Committee suggested, as a principle, that they
deemed it desirable that the nomination for Directors

should be made by stockholders twenty days at least in advance of the election, for reasons given in their letter to Mr. Corning. They also neged that a Committee of Stockholders should visit Albany and examine all accounts annually.

At the meeting held on Saturday the Committee

ent mitted the following named gentlemen as Directors for the ensuing year: John H. Cheddell, Auburn; Erastus Corning, A bany: Joseph Field, Rochester; John P. Moore, New-York; Alonzo C. Paige, Scheneetady; John V. L. Pruyn, Albany; Dean Rich mond, Buffalo; John L. Schoolcraft, Albany; Russell Sage, Troy; J. S. Seymour. Utica; Nathaniel Thayer, Boston; Isaac Townsend, New-York; Horase White, Syracuse.

The ticket was unanimously approved. The Committee also reported the draft of a letter to the Directors, as regards the details of management.

The letter recommends:

1. That so debt be created in any one year expeeding \$250,000, without first obtaining the consect of the stock-bolders in spublic meeting, of which formal notice skall be

holders in a public meeting, of which formal notice shall be given.

2. That the Company should not become implicated, as indersor or in any way, with another road, or allow its guarantee to be used for the benefit of any efficient or directors.

3. That all free passes except to Directors, be discontinued.

4. That a Committee of Directors, or agains appointed by them, shall make all purchases for the road, and that a Board of Auditors shall be formed, without whose signatures no bill shall be presented to the Treaswers.

5. That a Committee of five Stockholders, not Directors, small be appointed, who shall annually, thirty days before the election, make an examination of the affairs of the road, aided by accountants, at the expense of the Company. Thus, twenty days before the annual election, a general meeting of stockhold or shall be held to hear the report and nominate candidates for Directors.

The above recommendations of the Committee were also unat imously approved by the meeting, and Messrs. Joseph Battelle, E. G. Faile, M. Delano, J. D. Wolf, and A. R. Gallatin were appointed the first Committee to examine the accounts of the Company, &c.

A resolution was offered to the effect that quarterly or thrice yearly dividends were desirable, but it was ai hdrawn upon explanation by lease Newton, e-q of its impracticability. He stated that the road, like all others, in December January and February earned no surplus for dividends, if, indeed, it earned its secessary expenses.

A resolution was also offered that it was improper to purchase supplies of officers of the road, but not sustained.

A resolution of thanks was also tendered to E. G. Faile, esq., the retiring Director. An attempt was made to page a vote of confidence in the managers generally, which failed, and a suggestion was made that such a vote would come more properly from the general meeting, to be held in Albany next week.

A suggestion that the recommendations of the Committee in relation to Directors should have the sand tion of the Legislature was dismissed, upon an explanation by Mr. Livingston of New-York, that it was not expedient for the Company to go to the Lagislature upon any small matter, as something would be tacked n pot agreeable.

The meeting then adjourned.

Baltimore. Dec. 4.—Information has been received here to day, by way of Rio Jameiro, that the bark Francis Pariodes. Capt Broughton, hence in July last, bound to the West Coast of South America, had errung a leak at sea, and put late the Island of St. Caberines City of Destino, on the Sitk Sep. last, making 1,50 strokes per hour, foretopmast spring, trussel trees carried away, losing salis, and mon worn out pumping the cargo has been discharged, parily in a damaged state. The FP, is owned here, and is an old wessel, the only insurance knowing, is \$5.000 in Baltimore on wasel, \$10.000 in Philadelphia or westel and cargo, and \$5.000 on cargo in Georgia. The report of bark Giprey, dismasted off Montevideo, from Baltimore is an error, as no such vessel cleared from this per.

How Benc, Sept. 23.—The ship North Wind, previously reported, has discharged her cago, a large portion of which is damaged. The ships iforeque, and Surprise, have arrived, the first from New York, leaking badly; the leak is apposed to be near the water's edge. By letter to Eliwood Walter, seq. Mostruction, Ott. 3.—The bask Redmond, of and from Soton, with a cargo of flour bound to Suenes Ayres, grounded on the English Bark Shool on the 27th uit, and when stelking very heavily her masts were all cut away, and on the 28th all hands abandened her. The French steamer Bisson on the 29th, got under way and proceeded to the bark, and having arrived in the vicinity of the wreck, discovered her about 7 miles to the seatward of the Archimedes Back having floated off the shoal; on mearing the wreck they found her in possession of some persons from the city. The steamer took her in tow, and at 5 o'clock means are day, brought her to an anchor in the harbor with the whole of her cargo on board, which is supposed to be all in good order. Ble leaks considerably, her madder is carried away, and her sterm-frame is much shattered. The bark Gippey, from Baltinore, is at anchor some 27 miles to the castward of side port, dismasted, application having been made to the French commander, a steamer had been ordered to her audistance.
